Osaka Titanium technologies Co., Ltd.

Notice of the acquisition of AS9100 certification for TILOP(Pre-Alloy)

We are pleased to announce that we have recently acquired the certification of JIS Q 9100 (AS9100) which is a “quality management system standard for aerospace applications” with regard to our TILOP(Pre-Alloy) ,spherical titanium alloy powder.

“TILOP” is the brand name of our titanium powder by gas atomization method and has a history of more than 20 years.

1. Certified product
Category: High-performance material
Product: TILOP(Pre-Alloy), spherical titanium alloy powder
2. Applicable standard
JIS Q 9100:2016 (AS9100)
Quality management system: requirements for aerospace and defense sector organizations
3. Scope of registration
Manufacturing and sales of high-performance materials ,TILOP(Pre-Alloy)
4. Registration and Review Authority
Japan Quality Assurance Organization (JQA)

We have also acquired a JIS Q 9100 (AS9100) certification for our titanium sponge for mill products and titanium ingot in 2000 and have been maintaining them since then.
